August 2025
Letter from Grant Administrator

The Municipal Park Grant Commission was created by State Statute and is responsible for distributing tax revenues to municipalities in St. Louis County for the purpose of creating, improving, or expanding park and recreation facilities or programs.

The Commission is made up of a nine-member board - 7 voting members and two non-voting members. The seven voting members are representatives of the St. Louis County Council districts. The mayors/village chairpersons of each council district meet as independent groups to select their representative. Commissioners cannot be municipal officials. The two non-voting members are designated in the statutes as a city administrator/manager and the Chairman of the Park Advisory Committee, who is a park professional.

The funds overseen by the Commission are generated by the passage of two propositions supporting regional parks of which the Commission receives a calculated portion. The first was a 1/10 cent sales tax approved 2000 and the second was a 3/16 cent sales tax approved in 2013. It has been the goal of the Commission to keep administrative costs as low as possible in order to make the most of the taxpayer dollars. In the 2023 grant round, \$9,377,914 was awarded to 22 municipalities and the administrative costs were \$108,000. When interest is included, over 100% of the revenues were re-invested in municipal park capital improvement projects.

In 2016-17, the Commission invested \$5,000 in a new server in partnership with the Municipal League of Metro St. Louis. A new website was launched in June 2022 and Round 18 was the first year for an online application format designed to streamline the process. Subsequent rounds have continued using the online application for construction and planning grants.

The Commission also approved increasing the planning grants to \$10,000 in addition to making the grants available year-round to make the process more convenient for the municipalities.

The Commission appreciates the input and cooperation received from the municipalities in making this grant program successful by providing a variety of quality park and recreational facilities available to the residents of St. Louis County. We are extremely proud of the work we all do together. Please share this report with other officials and citizens in your municipality.

Sincerely,
